Conversational UIs
Spoken Language Processing

Dr. Dong Minghui

Institute for Infocomm Research

Agency for Science, Technology and Research (A-Star)

Email: mhdong@i2r.a-star.edu.sg

Outline of today's lecture

- **Highlight the key points of the topics**

- **Go through the sample programs (Speech processing, speech synthesis, speech recognition)**

- **Hands-on session for DialogFlow**

- **Homework**

- **Questions**

Quiz and Homework

- **Quizzes**

  - There is one quiz for each topic. Please complete them.

- **Homework**

  - Please complete today's homework and submit to Luminus system by end of Monday.

Homework

- **In the examples, we provided**

  - A sample program for speech input (test-asr.py)

  - A sample program for speech output (test-tts.py)

- **Your task:**

  - Please write your own program to support both speech input and speech output.

  - Please submit it to the LumiNUS.

Thank you!
